Subject: 2001 Monitoring Program

3/26/01

I apologize for the delay in getting this memo forwarded to all of you. As you recall, we discussed some time ago the possibility of doing some in-mine monitoring this Spring. CH2M Hill prepared the attached memo to look at a scaled-back monitoring approach that we could implement depending on funding available in the RI/FS budget. Please look over the memo and I'll set up a conference call for us to discuss. Please note - regarding available funding - I am uncertain right now of the extent of "excess" funding in the RI/FS budget to accomplish such monitoring activities. I will be looking at the budget more carefully over the next few days so that I can give you a sense of whether any monitoring activities appear likely.

Mary Kay
